

HELLO! I'M ELECTRO

AS YOU HAVE LEARNT, METAL IS ALL AROUND US.

BUT DO YOU KNOW HOW MUCH METAL YOU HAVE SURROUNDING YOU AT HOME?

DO YOU KNOW WHAT ALL OF THESE HAVE IN COMMON?

They all contain metal so that electricity can easily pass through them to make them work.

There is even precious metal, such as gold or silver, in some of these small electrical products. They are used in circuit boards found in laptops and tablets. Sadly though, there is not enough precious metal in these to make you rich!
